

eAuthentication (IdentityMinder 6.0) Upgrade Quick Reference Guide – Application Admin

This document is a quick reference guide for the Application Administrator role within the eAuthentication system. It will describe how the tasks have changed with the new look and feel of eAuthentication (IdentityMinder 6.0).

General Changes

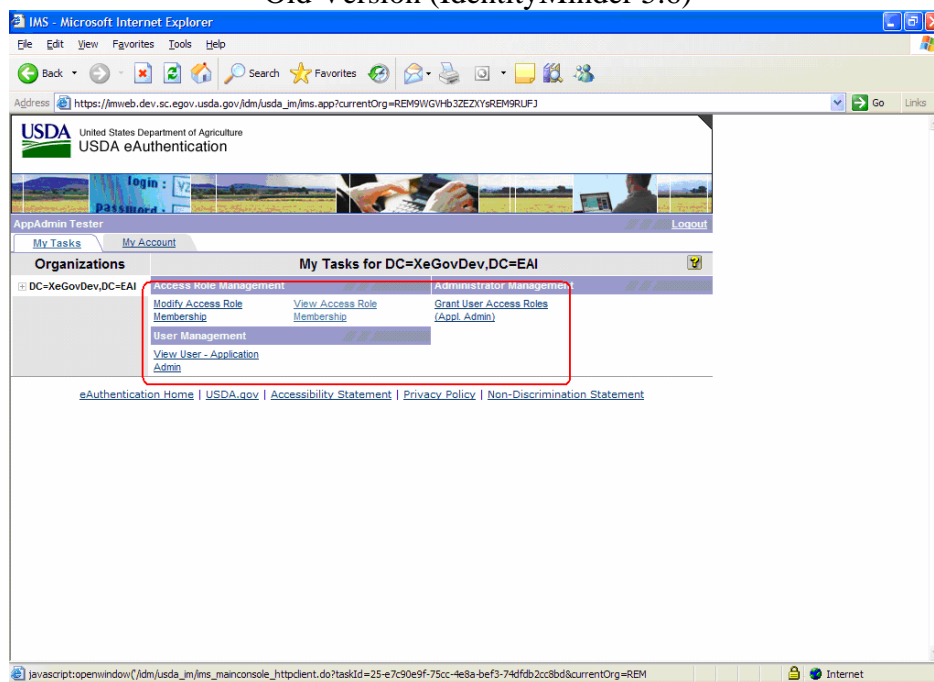

1. The table below lists the Application Admin task in the old version (5.6) and how the names have changed within the new version (6.0).

Old Version (5.6)	New Version (6.0)
Modify Access Role Membership	Modify Access Role Members/Administrators - Application Admin
Grant User Access Role – Application Admin	
View Access Role Membership	View Access Role Members/Administrators – Application Admin
View User – Application Admin	View User – Application Admin

Note: View User – Application Admin, has not changed with the upgrade.

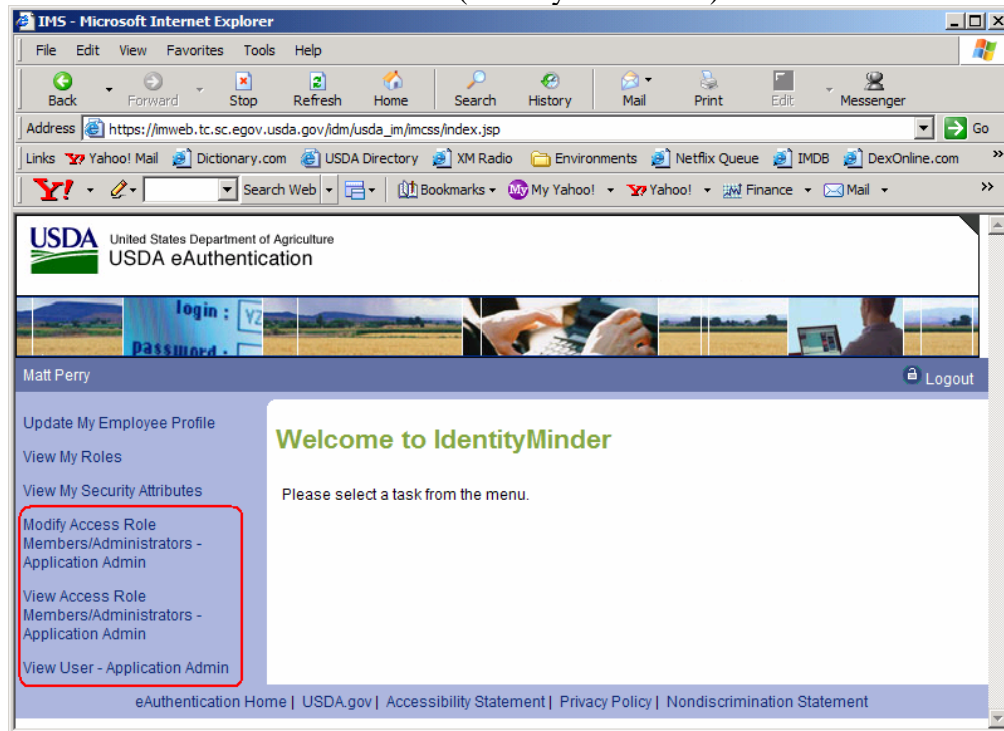

2. The initial screen in IdentityMinder has changed from a list of links in 5.6 to a drop down menu in 6.0. Depending on the number of task assign to your account, tasks will be listed on the left navigation bar, or listed in categories along with the appropriate tasks in 6.0.

Old Version (IdentityMinder 5.6)

New Version (IdentityMinder 6.0)

3. The “Can Use Role” functionality that is used to give role/task access to a user has changed to “Member” and has become a tab on the screen.
4. The “Can Assign Role” functionality that is used to give a user administrative access has changed to “Administrator” and has become a tab on the screen.

Support
